

StoryForge AI - Software Requirements Specification (SRS) v1.0

Vision

Build an AI-powered multilingual storytelling platform that transforms a simple idea into a professional animated story video using an intelligent multi-agent workflow.

Mission

Empower creators to produce meaningful animated stories inspired by Indian epics, values and philosophy while supporting multiple languages.

Target Users

Phase 1: Personal production studio. Phase 2: YouTube creators, educators, storytellers and studios.

Core Features

Story generation, screenplay, scene planning, character memory, storyboard, image prompts, animation, voice-over, subtitles, music, video assembly, publishing.

Director AI

Coordinates specialized AI agents, reviews quality, maintains continuity, and manages regeneration.

Knowledge Library

Curated knowledge from Ramayana, Mahabharata, Bhagavad Gita, Panchatantra, public-domain literature, and custom storytelling guides.

Development Principles

Modular architecture, AI-provider independence, multilingual support, clean code, testing, documentation, scalability.

Founder Vision

Create meaningful stories that educate, inspire and entertain while respecting Indian culture and making high-quality storytelling accessible through AI.
